This groundbreaking and innovative text addresses the deep ontological and epistemological commitments that underpin conventional positivist methods and then demonstrates how "method" can be understood in much broader and more interesting ways. Drawing on a broad range of philosophical and methodological theory as well as a wide variety of artistic sources from fine art to cinema and from literature to the blues, leading contemporary thinker Michael Shapiro shows the reader how a more open understanding of the concept of method is rewarding and enlightening. His notion of 'writing-as-method' is enacted throughout the text and offers a stimulating alternative for students to positivist social science methods. This is essential reading for all students and faculty with an interest in post-positivist methods.

The hedge fund industry has grown dramatically over the last two decades, with more than eight thousand funds now controlling close to two trillion dollars. Originally intended for the wealthy, these private investments have now attracted a much broader following that includes pension funds and retail investors. Because hedge funds are largely unregulated and shrouded in secrecy, they have developed a mystique and allure that can beguile even the most experienced investor. In Hedge Funds, Andrew Lo--one of the world's most respected financial economists--addresses the pressing need for a systematic framework for managing hedge fund investments. Arguing that hedge funds have very different risk and return characteristics than traditional investments, Lo constructs new tools for analyzing their dynamics, including measures of illiquidity exposure and performance smoothing, linear and nonlinear risk models that capture alternative betas, econometric models of hedge fund failure rates, and integrated investment processes for alternative investments. In a new chapter, he looks at how the strategies for and regulation of hedge funds have changed in the aftermath of the financial crisis.
