Seventh Grade Environmental Science Science Projects

Ecology is the study of how living things interact with each other and their environment. Earlier this year we learned about the levels of organization within an organism: cell-tissue-organ-organ system-organism. Now we are looking at the levels of organization starting at an individual (i.e., organism) and ending with the biosphere (i.e., earth).

Purpose The Individual Student Reports (ISR) provides information on how your student performed on End-of-Grade, End-of-Course, or NCEXTEND1 assessment. The scores on these assessments are only one of many indicators of how well your student is achieving. Test scores should always be considered along with all other variable with all other available information provided about your student.

NC DPI: Individual Student Reports (ISR)

A typical course of study for seventh-grade language arts includes literature, composition, grammar, and vocabulary building. In seventh grade, students are expected to analyze text and infer its message, citing the text to support their analysis.
