A Train Railroading

A Ressha de Ikou MD (アトレイア, "MD A-Train") is a simulation game involving the construction of a railroad in order to boost the city's mass transit system. [citation needed] The game was released to an exclusively Japanese market; with no release ever being attempted for the North American or European markets.

A-Train - Wikipedia

The A-train family comprises trains for both commuter services and limited express services. Hitachi has given the family a modular design which enables both production and refurbishment to be undertaken faster. The A-train's strong body is the result of the use of revolutionary technology called friction stir welding (FSW).

Hitachi A-train - Wikipedia

Train whistles, bells or horns warn of the presence of a train, while trackside signals maintain the distances between trains. An important element in the safety of many high-speed inter-city networks such as Japan's Shinkansen is the fact that trains only run on dedicated railway lines, without level crossings.

Rail transport - Wikipedia

Cork or foam model train roadbed should be used under tracks and can be bought at hobby or hardware stores. If you're just starting out modeling, it can be difficult to know if you have enough clearance for long cars. Before installing your track, use your hands to guide your train around curves to see if it fits.

How to Build a Model Railroad: 13 Steps (with Pictures ...

An important feature of a railroad curve is the extent to which it is "superelevated," or banked. To counteract centrifugal force as a train rounds a curve, the outer rail is raised to a higher level than the inner one. The difference in elevation between the two rails - called the "cross-level" - is how civil engineers measure superelevation.

Grades and curves | Trains Magazine

railroading In gaming, the act of forcing a player to "choose to" do something they don't really want to in order to advance the plot according to the wishes or designs of the GM. Thus, the player feels like they're being moved through a world (or plot) as if on train tracks, without any choice on where to go.
