Introduction to Calculus for Business and Economics I. Functions  $y = f(x)$  is a function of  $x$  if and only if, for each  $x$  in the domain of  $f(x)$ , that is the values of  $x$  for which  $f(x)$  is defined, there is exactly one value of  $f(x)$ . Examples: 1.  $y = 2 - 3x$  is a function 2.

### **Introduction to calculus for business and economics**

We see  $f(4) = 21$ . Thus, we see that as  $x$  approaches 4,  $f(x)$  approaches 21. In general, if  $f(x)$  has a limit at  $x = a$ , then the limit of  $f(x)$  as  $x$  approaches the value  $a$  equals the value of  $f(x)$  at  $x = a$ .

### **Introduction to calculus for business and economics**

Essential Mathematics for Economics and Business has become established as one of the leading introductory books on mathematics. It combines a non-rigorous approach to mathematics with applications in economics and business. The fundamental mathematical concepts are explained as simply and as briefly as possible, using a wide selection of ...
