How the Body Shapes the Mind is an interdisciplinary work that addresses philosophical questions by appealing to evidence found in experimental psychology, neuroscience, studies of pathologies, and developmental psychology. There is a growing consensus across these disciplines that the contribution of embodiment to cognition is inescapable. Because this insight has been developed across a variety of disciplines, however, there is still a need to develop a common vocabulary that is capable of integrating discussions of brain mechanisms in neuroscience, behavioural expressions in psychology, design concerns in artificial intelligence and robotics, and debates about embodied experience in the phenomenology and philosophy of mind. Shaun Gallagher's book aims to contribute to the formulation of that common vocabulary and to develop a conceptual framework that will avoid both the overly reductionistic approaches that explain everything in terms of bottom-up neuronal mechanisms, and inflationistic approaches that explain everything in terms of Cartesian, top-down cognitive states. Gallagher pursues two basic sets of questions. The first set consists of questions about the phenomenal aspects of the structure of experience, and specifically the relatively regular and constant features that we find in the content of our experience. If throughout conscious experience there is a constant reference to one's own body, even if this is a recessive or marginal awareness, then that reference constitutes a structural feature of the phenomenal field of consciousness, part of a framework that is likely to determine or influence all other aspects of experience. The second set of questions concerns aspects of the structure of experience that are more hidden, those that may be more difficult to get at because they happen before we know it. They do not normally enter into the content of experience in an explicit way, and are often inaccessible to reflective consciousness. To what extent, and in what ways, are consciousness and cognitive processes, which include experiences related to perception, memory, imagination, belief, judgement, and so forth, shaped or structured by the fact that they are embodied in this way?

Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name sharawaggi. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.

The first book in the Shadowfell trilogy from the acclaimed author of the Sevenwaters series "An exquisitely written tale of love, fear, faith and difficult choices ... Marillier is a consummate craftswoman." Sydney Morning Herald The people of Alban are afraid. The tyrannical king and his masked Enforcers are scouring the land, burning villages and enslaving the canny. Fifteen-year-old Neryn has fled her home in the wake of its destruction, and is alone and penniless, hiding her extraordinary magical power. She can rely on no one - not even the elusive Good Folk who challenge and bewilder her with their words. When an enigmatic stranger saves her life, Neryn and the young man called Flint begin an uneasy journey together. She wants to trust Flint but how can she tell who is true in this land of evil? For Neryn has heard whisper of a mysterious place far away: a place where rebels are amassing to free the land and end the King's reign. A place called Shadowfell. A story of courage, hope, danger and love from one of the most compelling fantasy storytellers writing today. "A new book by Juliet Marillier is always a cause for celebration" Kate Forsyth Winner of the Tin Duck Award for Speculative Fiction Finalist in the Sir Julius Vogel Awards Fans of Marion Zimmer Bradley, Isabelle Carmody and Robin Hobb will love Juliet Marillier.
