Under the name Pamela Longfellow she wrote China Blues and Chasing Women. Flow Down Like Silver, a novel of Hypatia of Alexandria is the second of a trilogy on the Divine Feminine. She is now working on the final book, The Woman Who Knew The All, the life of Mary Magdalene after the death of Jesus. --This text refers to the paperback edition.

Ki Longfellow, author of the acclaimed The Secret Magdalene, has now written the astonishing life of Hypatia, famed throughout the Mediterranean world, a beauty and a genius, yet for 17 centuries ignored by history. As the Roman Empire fights for its life and emerging Christianity fights for our souls, Hypatia is the last great voice of reason. A woman of sublime intelligence, Hypatia ranks above not only all women, but all men. Hypatia dazzled the world with her brilliance, was courted by men of every persuasion and was considered the leading philosopher and mathematician of her age...yet her mathematics, her inventions, the very story of her life in all its epic and dramatic intensity, has gone untold. A heart-breaking love story, an heroic struggle against intolerance, a tragedy and a triumph, Hypatia walks through these pages fully realized while all around her Egypt's Alexandria, the New York City of its day, strives to remain a beacon of light in a darkening world.

A historical novel follows the life of Mary Magdalene, detailing her privileged childhood, her prophetic visions, her study in the Great Library of Alexandria, her fascination with John the Baptizer's cousin Yeshu'a, and her role as teacher and advisor to Jesus.

Hypatia-brilliant mathematician, eloquent Neoplatonist, and a woman renowned for her beauty-was brutally murdered by a mob of Christians in Alexandria in 415. She has been a legend ever since. In this engrossing book, Maria Dzielska searches behind the legend to bring us the real story of Hypatia's life and death, and new insight into her colorful world. Historians and poets, Victorian novelists and contemporary feminists have seen Hypatia as a symbol-of the waning of classical culture and freedom of inquiry, of the rise of fanatical Christianity, or of sexual freedom. Dzielska shows us why versions of Hypatia's legend have served her champions' purposes, and how they have distorted the true story. She takes us back to the Alexandria of Hypatia's day, with its Library and Museion, pagan cults and the pontificate of Saint Cyril, thriving Jewish community and vibrant Greek culture, and circles of philosophers, mathematicians, astronomers, and militant Christians. Drawing on the letters of Hypatia's most prominent pupil, Synesius of Cyrene, Dzielska constructs a compelling picture of the young philosopher's disciples and her teaching. Finally she plumbs her sources for the facts surrounding Hypatia's cruel death, clarifying what the murder tells us about the tensions of this tumultuous era.

Who was Hypatia, Lady Philosopher of Alexandria? A brilliant young mathematician and scientist, murdered by a religious mob? An aging academic assassinated by a rival political party? A sorceress who kept the governor and people of Alexandria in thrall through satanic wiles? Did she discover that the earth circled the sun a thousand years before Copernicus or was she merely a gifted geometry teacher? Hypatia is the subject of much myth-making through the centuries. She's featured in poetry, plays, novels and movies. This collection of essays pulls back the curtain and lets the reader see the real woman behind the stories. You'll find Hypatia needs no embellishment to be a heroine.

Ki Longfellow, acclaimed author of Flow Down Like Silver: Hypatia of Alexandria, The Secret Magdalene, and Houdini Heart has penned Walks Away Woman, a remarkable story of an ordinary woman driven to an extraordinary decision. Overwhelmed, overwrought, and overweight, an everyday housewife walks into the Sonoran Desert to die. But there is more to a desert than sand: thorns, venom, heat, man, beast-and adventure.

Deakin's notes are full of useful informatoin, and his book is both comprehensive and captivating. - ISISIn the late fourth and early fifth centuries of our era, Hypatia of Alexandria was the world's greatest living mathematician and astronomer. A strikingly beautiful woman and a devoted celibate, she lived in a city as turbulent and troubled as Baghdad or Beirut is today. She achieved fame not only in her special field, but also as a philosopher, religious thinker, and teacher who attracted a large popular following. Her life ended tragically in violence at the hands of a rampaging mob of Christian fanatics, who killed her for her pagan beliefs, some say at the instigation of St. Cyril of Alexandria.This is the first biography of Hypatia to integrate all aspects of her life. Mathematician Michael Deakin emphasizes that, though she was a philosopher, she was first and foremost a mathematician and astronomer of great accomplishment. In a fascinating narrative that brings to life a richly diverse ancient society, he describes her work so that the mathematics, presented in straightforward terms, finds its true place in the context of her life as a whole. Deakin supplies full detail on the historical, intellectual, and religious context of Hypatia's times. He also analyzes the pattern of her life and thought, and finally gives an account of the events leading up to her lynch-mob execution.Although this outrageous crime has made Hypatia a powerful symbol of intellectual freedom and feminist aspiration to this day, Deakin makes clear that the important intellectual contributions of her life's work should not be overshadowed by her tragic death.Michael A. B. Deakin (Melbourne, Victoria, Australia) is an honorary research fellow and formerly a senior lecturer in the School of Mathematical Sciences of Monash University.

This biography of Hypatia, the female philosopher and mathematician in Christian Egypt, provides background on her work and her life as an elite woman at this time. There are many myths about Hypatia, including her research, inventions and the impact of her murder, all based on a handful of contemporary resources. Through presenting the different theories and myths alongside the available evidence, this book will enable the reader to make their own interpretations about her life. Whilst the evidence does leave many questions unanswered, this book provides the evidence as it stands, separating the myth from reality. There is very little published on Hypatia and she forms quite a niche market in the history of ancient Egypt. However, she is an interesting example of how multicultural Alexandria functioned at such an unstable political time, and provides anecdotal evidence of the atrocities that occurred. This book will appeal to scholars, lay people and political and religious researchers, and will show that the history of Egypt does not end at Cleopatra.

Ourselves, the fourth volume of Charlotte Mason's Classic Homeschooling Series, is a character curriculum book written directly to children. Book I, Self-Knowledge, is for elementary school students; Book II, Self-Direction, is for older students. Self-Knowledge discusses our human desires and appetites; the "helpers" in our minds, such as intellect, sense of beauty, imagination, and reason; the ways in which we feel and express love for others, including sympathy, kindness, generosity, gratitude, courage, loyalty, and humility; and truth, justice, and integrity, and ends by encouraging children to develop the habit of being useful. Self-Direction is an in-depth discussion of the conscience and virtues such as temperance, chastity, fortitude, and prudence; the will and self-control; and the soul and its capacities, such as prayer, thanksgiving, faith, and praise. Charlotte Mason was a late nineteenth-century British educator whose ideas were far ahead of her time. She believed that children are born persons worthy of respect, rather than blank slates, and that it was better to feed their growing minds with living literature and vital ideas and knowledge, rather than dry facts and knowledge filtered and pre-digested by the teacher. Her method of education, still used by some private schools and many homeschooling families, is gentle and flexible, especially with younger children, and includes first-hand exposure to great and noble ideas through books in each school subject, conveying wonder and arousing curiosity, and through reflection upon great art, music, and poetry; nature observation as the primary means of early science teaching; use of manipulatives and real-life application to understand mathematical concepts and learning to reason, rather than rote memorization and working endless sums; and an emphasis on character and on cultivating and maintaining good personal habits. Schooling is teacher-directed, not child-led, but school time should be short enough to a
