Green from the ground up. In a nation known as the Garden City, one particular garden is defying expectations and gravity. Singapore, renowned for being one of the world's greatest cities, is perhaps one of the greenest too. The award-winning Gardens by the Bay, and UNESCO World Heritage Site, the Singapore Botanic Gardens, are prime examples. But one of its best-known is a field of green that stretches not across the city, but towards the sky.

It is said that the history of modern architecture can be observed through the evolution of the single-family home. Over generations, each has hoped to improve on the last, rethinking and reinventing this seemingly simple building type. At certain historic moments in the discourse, new ideas about domesticity have given form to radically different configurations of home and community. Current

care. Peter Lazes and Marie Rudden show how collaboration and active communication among administrators, medical staff, and patients are a core element of a successful organizational change effort. Through case studies and the direct voices and experiences of frontline workers, they explore exactly what it takes to effectively engage staff and providers in improving the patient care shortcomings within their institutions. This book not only is a manual detailing what can be achieved when frontline staff have a direct voice in controlling their practice environments but was written to show how to accomplish transformative changes in how our hospitals and outpatient clinics work. At a time when the massive gaps in our healthcare systems have been laid bare by the fragmented responses to the COVID-19 pandemic, this book offers hope and a plan for change.

NEW YORK TIMES BESTSELLER □ From the longtime CEO and chairman of Starbucks, a bold, dramatic work about the new responsibilities that leaders, businesses, and citizens share in American society today—as viewed through the intimate lens of one man’s life and work. What do we owe one another? How do we channel our drive, ingenuity, even our pain, into something more meaningful than individual success? And what is our duty in the places where we live, work, and play? These questions are at the heart of the American journey. They are also ones that Howard Schultz has grappled with personally since growing up in the Brooklyn housing projects and while building Starbucks from eleven stores into one of the world’s most iconic brands. In *From the Ground Up*, Schultz looks for answers in two interwoven

narratives. One story shows how his conflicted boyhood—including experiences he has never before revealed—motivated Schultz to become the first in his family to graduate from college, then to build the kind of company his father, a working-class laborer, never had a chance to work for: a business that tries to balance profit and human dignity. A parallel story offers a behind-the-scenes look at Schultz's unconventional efforts to challenge old notions about the role of business in society. From health insurance and free college tuition for part-time baristas to controversial initiatives about race and refugees, Schultz and his team tackled societal issues with the same creativity and rigor they applied to changing how the world consumes coffee. Throughout the book, Schultz introduces a cross-section of Americans transforming common struggles into shared successes. In these pages, lost youth find first jobs, aspiring college

students overcome the yoke of debt, post-9/11 warriors replace lost limbs with indomitable spirit, former coal miners and opioid addicts pave fresh paths, entrepreneurs jump-start dreams, and better angels emerge from all corners of the country. From the Ground Up is part candid memoir, part uplifting blueprint of mutual responsibility, and part proof that ordinary people can do extraordinary things. At its heart, it's an optimistic, inspiring account of what happens when we stand up, speak out, and come together for purposes bigger than ourselves. Here is a new vision of what can be when we try our best to lead lives through the lens of humanity. "Howard Schultz's story is a clear reminder that success is not achieved through individual determination alone, but through partnership and community. After decades of scholarship on the civil rights movement at the local level, the insights of bottom-up movement history remain essentially invisible in the accepted narrative of the movement and peripheral to debates on how to research, document, and teach about the movement. This collection of original works refocuses attention on this bottom-up history and compels a rethinking of what and who we think is central to the movement. The essays examine such locales as Sunflower County, Mississippi; Memphis, Tennessee; and Wilson, North Carolina; and engage such issues as nonviolence and self-defense, the implications of focusing on women in the movement, and struggles for freedom beyond voting rights and school desegregation. Events and incidents discussed range from the

movement's heyday to the present and include the Poor People's Campaign mule train to Washington, D.C., the popular response to the deaths of Rosa Parks and Coretta Scott King, and political cartoons addressing Barack Obama's presidential campaign. The kinds of scholarship represented here--which draw on oral history and activist insights (along with traditional sources) and which bring the specificity of time and place into dialogue with broad themes and a national context--are crucial as we continue to foster scholarly debates, evaluate newer conceptual frameworks, and replace the superficial narrative that persists in the popular imagination.

your hands in the earth and work with the real thing. This is a book on green spirituality that makes a difference, empowering you to connect with totems as a part of your spiritual life. Uniquely approaching totems as beings we can give to, rather than take from, Lupa shows how orienting yourself this way deepens your spiritual connection to the earth and helps you rejoin the community of nature. And while most books on totems focus on animals, Nature Spirituality from the Ground Up helps you work with interconnected ecosystems of totems: plants, fungi, minerals, waterways, landforms, and more.
