This edited volume showcases work from the emerging field of design-based research (DBR) within social studies education and explores the unique challenges and opportunities that arise when applying the approach in classrooms. Usually associated with STEM fields, DBR's unique ability to generate practical theories of learning and to engineer theory-driven improvements to practice holds meaningful potential for the social studies. Each chapter describes a different DBR study, exploring the affordances and dilemmas of the approach. Chapters cover such topics as iterative design, using and producing theory, collaborating with educators, and the ways that DBR attends to historical, political, and social context.

The author wrote this new edition of the most popular elementary social studies methods text on the market with the following three goals in mind: to present the most powerful social studies content and pedagogy for children in elementary school, to offer the material in simple and accessible ways, and to write in a first person active voice. The purpose of this book is to introduce new teachers to the world of social studies teaching and learning in elementary and middle schools. Geography, history, government and the other social sciences are delivered into the palm of the new teacher's hand along with a suite of tools for bringing social studies to life in the classroom. The book is organized into three sections—the first orients the reader to the mission of social studies education to the increasingly diverse children we teach, the second concentrates on the curriculum, and the third deals with instruction, how we plan and teach this curriculum. Three central themes continue to pervade the book—democratic citizenship, diversity, and the social sciences—to ultimately encourage teachers to excite their students about closing the gap between social realities and democratic ideals. An exceptionally strong chapter on multicultural issues (Chapter 2) helps future teachers truly understand the changing demographics of the American classroom.

Teaching Social Studies: A Methods Book for Methods Teachers, features tasks designed to take preservice teachers deep into schools in general and into social studies education in particular. Organized around Joseph Schwab's commonplaces of education and recognizing the role of inquiry as a preferred pedagogy in social studies, the book offers a series of short chapters that highlight learners and learning, subject matter, teachers and teaching, and school context. The 42 chapters describe tasks that the authors assign to their methods students as either in?class or as outside?of?class assignments. The components of each chapter are: > Summary of the task > Description of the exercise (i.e., what students are to do, the necessary resources, the timeframe for completion, grading criteria) > Description of how students respond to the activity > Description of how the task fits into the overall course > List of readings and references > Appendix that supplements the task description

This sourcebook contains more than twelve hundred easy-to-follow and implement classroom activities created and tested by veteran teachers from all over the country. The activities are arranged by grade level and are keyed to the revised National History Standards, so they can easily be matched to comparable state history standards. This volume offers teachers a treasury of ideas for bringing history alive in grades 5?12, carrying students far beyond their textbooks on active-learning voyages into the past while still meeting required learning content. It also incorporates the History Thinking Skills from the revised National History Standards as well as annotated lists of general and era-specific resources that will help teachers enrich their classes with CD-ROMs, audio-visual material, primary sources, art and music, and various print materials. Grades 5?12

Social Studies in the New Education Policy Era is a series of compelling open-ended education policy dialogues among various social studies scholars and stakeholders. By facilitating conversations about the relationships among policy, practice, and research in social studies education, this collection illuminates various positions—some similar, some divergent—on contested issues in the field, from the effects of standardized curriculum and assessment mandates on K–12 teaching to the appropriate roles of social studies educators as public policy advocates. Chapter authors bring diverse professional experiences to the questions at hand, offering readers multiple perspectives from which to delve into well-informed discussions about social studies education in past, present, and future policy contexts. Collectively, their commentaries aim to inspire, challenge, and ultimately strengthen readers' beliefs about the place of social studies in present and future education policy environments.

Social Studies Today will help educators—teachers, curriculum specialists, and researchers—think deeply about contemporary social studies education. More than simply learning about key topics, this collection invites readers to think through some of the most relevant, dynamic, and challenging questions animating social studies education today. With 12 new chapters highlighting recent developments in the field, the second edition features the work of major scholars such as James Banks, Diana Hess, Joel Westheimer, Meira Levinson, Sam Wineburg, Beth Rubin, Keith Barton, Margaret Crocco, and more. Each chapter tackles a specific question on issues such as the difficulties of teaching historical thinking in the classroom, responding to high-stakes testing, teaching patriotism, judging the credibility of Internet sources, and teaching with film and geospatial technologies. Accessible, compelling, and practical, these chapters—full of rich examples and illustrations—showcase some of the most original thinking in the field, and offer pre- and in-service teachers alike a panoramic window on social studies curricula and instruction and new ways to improve them. Walter C. Parker is Professor and Chair of Social Studies Education and (by courtesy) Professor of Political Science at the University of Washington, Seattle.

Help students move from surface-level learning to the transfer of understanding. How do social studies teachers maximize instruction to ensure students are prepared for an informed civic life? This book shows how the field is more than simply memorizing dates and facts—it encapsulates the skillful ability to conduct investigations, analyze sources, place events in historical context, and synthesize divergent points of view. Best practices for applying visible learning are presented through: · A scaffolded approach including surface-level learning, deep learning, and transfer of learning · Examples of strategies, lessons, and activities best suited for each level of learning · Planning tools, rubrics, and templates to guide instruction

This volume fills a significant gap in the scholarship on social studies education by providing thoughtful reflections on research methods in the field. It is not a "how to" guide but an exploration of key issues related to the design and implementation of empirical studies. The authors are active researchers who use varied methods in diverse settings—including historical research, international comparative studies, survey research, interviews with students and teachers, classroom observations, self-studies and action research, and emancipatory methodologies. They use their own experiences to examine such topics as the conceptualization of research questions, relationships with participants, researchers' identities, and elicitation of students' and teachers' thinking. This collection should become indispensable for both beginning and experienced scholars in social studies.

Written by the lead authors of the C3 Framework, *Inquiry-Based Practice in Social Studies Education: Understanding the Inquiry Design Model* presents a conceptual base for shaping the classroom experience through inquiry-based teaching and learning. Using their Inquiry Design Model (IDM), the authors present a field-tested approach for ambitious social studies teaching. They do so by providing a detailed account of inquiry's scholarly roots, as well as the rationale for viewing questions, tasks, and sources as inquiry's foundational elements. Based on work done with classroom teachers, university faculty, and state education department personnel, this book encourages readers to transform classrooms into places where inquiry thrives as everyday practice. Both pre-service and in-service teachers are sure to learn strategies for developing the reinforcing elements of IDM, from planning inquiries to communicating conclusions and taking informed action. The curricular and pedagogical examples included make this practical book essential reading for researchers, students of pre-service and in-service methods courses, and professional development programs.
