The Asia-Pacific region has
emerged as a dominant player

World trade and economics,
with the center of gravity
shifting to this region.
This book presents
analytical insights into the
various regional and
bilateral trade agreements
(RTAs) and their beneficial

effects on bilateral trade and development. It provides an incisive analysis and a roundup of all major RTAs and also presents an overview of all major agreements between the countries involved, which

once those taken into account could ensure the successful execution of the agreements. The book dwells on the issue of regionalism and multilateralism with reference to General Agreements on Trade and

Tariffs and World Trade Organisation, which have revolutionized the trade dynamics by opening up new areas of trade-rules and formulating specific policy guidelines for the member countries to adhere to

during trade negotiations.
The book also provides new
insights into some of the
issues of negotiations such
as sensitive lists, trade
and investment cooperation,
including trade in services,
rules of origin, non-tariff

barriers, anti-dumping etc.

The book also focuses on policy instruments that could convert trade gains to development gains. The existing economic cooperation arrangements in the region as well as those

empirical insights and
policy suggestions are
elucidated in detail./a
