Social media penetrate our lives: Facebook, YouTube, Twitter and many other platforms define daily habits of communication and creative production. This book studies the rise of social media, providing both a historical and a critical analysis of the emergence of major platforms in the context of a rapidly changing ecosystem of connective media. Author José van Dijck offers an analytical prism that can be used to view techno-cultural as well as socio-economic aspects of this transformation as well as to examine shared ideological principles between major social media platforms. This fascinating study will appeal to all readers interested in social media.

This edition takes into account the research from Australia available through bodies such as ANZMAC and Australasian Marketing Journal. It provides an explanation of what consumer behaviour variables are and the types and importance of each.

For undergraduate and graduate Principles of Management courses. This text connects theory with practice, incorporating the latest research findings to make management relevant and exciting to aspiring managers.

Questions of values, ontologies, ethics, aesthetics, discourse, origins, language, literature, and meaning do not lend themselves readily, or traditionally, to equations, probabilities, and models. However, with the increased adoption of natural science tools in economics, anthropology, and political science-to name only a few social scientific fie

This volume completes the immensely learned three-volume A History of Religious Ideas. Eliade examines the movement of Jewish thought out of ancient Eurasia, the Christian transformation of the Mediterranean area and Europe, and the rise and diffusion of Islam from approximately the sixth through the seventeenth centuries. Eliade's vast knowledge of past and present scholarship provides a synthesis that is unparalleled. In addition to reviewing recent interpretations of the individual traditions, he explores the interactions of the three religions and shows their continuing mutual influence to be subtle but unmistakable. As in his previous work, Eliade pays particular attention to heresies, folk beliefs, and cults of secret wisdom, such as alchemy and sorcery, and continues the discussion, begun in earlier volumes, of pre-Christian shamanistic practices in northern Europe and the syncretistic tradition of Tibetan Buddhism. These subcultures, he maintains, are as important as the better-known orthodoxies to a full understanding of Judaism, Christianity, and Islam.

The New York Times best selling book that takes you inside SEAL Team Six – the covert squad that killed Osama Bin Laden SEAL Team Six is a secret unit tasked with counterterrorism, hostage rescue, and counterinsurgency. In this dramatic, behind-the-scenes chronicle, Howard Wasdin takes readers deep inside the world of Navy SEALs and Special Forces snipers, beginning with the grueling selection process of Basic Underwater Demolition/SEAL (BUD/S)—the toughest and longest military training in the world. After graduating, Wasdin faced new challenges. First there was combat in Operation Desert Storm as a member of SEAL Team Two. Then the Green Course: the selection process to join the legendary SEAL Team Six, with a curriculum that included practiced land warfare to unarmed combat. More than learning how to pick a lock, they learned how to blow the door off its hinges. Finally as a member of SEAL Team Six he graduated from the most storied and challenging sniper program in the country: The Marine's Scout Sniper School. Eventually, of the 18 snipers in SEAL Team Six, Wasdin became the best—which meant one of the best snipers on the planet. Less than half a year after sniper school, he was fighting for his life. The mission: capture or kill Somalian warlord Mohamed Farrah Aidid. From rooftops, helicopters and alleys, Wasdin hunted Aidid and killed his men whenever possible. But everything went quickly to hell when his small band of soldiers found themselves fighting for their lives, cut off from help, and desperately trying to rescue downed comrades during a routine mission. The Battle of Mogadishu, as it become known, left 18 American soldiers dead and 73 wounded. Howard Wasdin had both of his legs nearly blown off while engaging the enemy. His dramatic combat tales combined with inside details of becoming one of the world's deadliest snipers make this one of the most explosive military memoirs in years.
