Service has been fully updated and expanded to address the latest technology and automotive systems. Written to current ASE tasks and standards, the text covers the 8 major areas of automotive service in 136 concise chapters. Many chapters include practical examples and step-by-step photo sequences covering terminology, best practices, and on-the-job procedures. Now in the sixth edition are case studies that include the "Three Cs" (Complaint, Cause and Correction). The 6th edition includes 6 new chapters which include that latest automotive technology as well as breaking up long chapters into two shorter and easier to read chapters. It also includes 50 new videos and over 100 new full color photos and line drawings to help bring the topics to life. Automotive Technology, 6th

designed and written to continue to prepare students for those challenges. This book concentrates on the need-to-know essentials of the various automotive systems (and how they have changed from the vehicles of yesterday), the operation of today's vehicles, and what to expect in the near future. New technology is addressed throughout the book in addition to the standard technology that students can expect to see in most vehicles. Each topic is explained in a logical way. Many years of teaching have provided the author team of this text with a good sense of how students read and study technical material, as well as what draws their interest to a topic and keeps it there. This knowledge has been incorporated in the writing and the features of this book.
