Social cohesion is a topic of increasing importance in a rapidly globalizing world. The coherence of the social fabric has become a key policy goal around the globe – not only in the Western Hemisphere, but also in Asia. A new study based on the findings of the Bertelsmann Stiftung’s “Social Cohesion Radar” compares, for the first time, social cohesion in Western and Asian societies.

Cory Rodgers 17/01/2020. Social cohesion is now a mainstream policy objective for the UN Refugee Agency (UNHCR) and its partners. It is an integral part of the Regional Refugee and Resilience Plan for Syria, with community-based initiatives in Turkey, Lebanon, Jordan and other affected countries. Meanwhile UNICEF is investigating the potential for cash transfers to foster social cohesion between Colombian refugees and their Ecuadorian hosts.

Book Description. This book examines various attempts in the 'West' to manage cultural, linguistic, and religious diversity – focusing on Muslim minorities in predominantly non-Muslim societies. An international panel of contributors chart evolving national identities and social values, assessing the way that both contemporary 'Western' societies and contemporary Muslim minorities view themselves and respond to the challenges of diversity.

High Level Conference on Economic and social cohesion in the Western Balkans The Conference would gather EESC members, civil society representatives of the countries of the Western Balkans, as well as Bulgarian officials and members of the organized civil society .

Many people in the Western world are concerned that the social fabric of societies is fraying. This book constitutes the first-of-its-kind systematic account of social cohesion, from theory through methodology to empirical evidence. Readers are introduced to the academically developed Social Cohesion Radar of Bertelsmann Stiftung, a globally active non-governmental organization. The Social Cohesion Radar defines and measures cohesion as characterized by three core aspects: resilient social relations, positive emotional connectedness between people and the community, and a pronounced focus on the common good. Using high-quality academic and institutional data sources, the Social Cohesion Radar provides insights into the level and development of social cohesion over a period of almost 25 years internationally, among 34 European Union and OECD members, and regionally, among the 16 federal states of Germany. It further provides insights into what influences cohesion, and what cohesion is good for. One of the key findings is that social cohesion promotes a happier life for everyone.

The book explores the ways in which social cohesion -- measured as trust in unknown fellow citizens -- can be established and undermined. It examines the US and UK, where social cohesion declined in the latter part of the 20th century, and Sweden and Denmark, where social cohesion increased, and aims to put forward a social constructivist explanation for this shift. Based on unique empirical data material, it demonstrates how "the bottom" and "the middle" of society is differently constructed across countries.

This book examines various attempts in the 'West' to manage cultural, linguistic, and religious diversity – focusing on Muslim minorities in predominantly non-Muslim societies. An international panel of

Contributors chart evolving national identities and social values, assessing the way that both contemporary 'Western' societies and contemporary Muslim minorities view themselves and respond to the challenges of diversity. Drawing on themes and priority subjects from Islamic Culture within Euro-Asian, Australian, and American international research, they address multiple critical issues and discuss their implications for existing and future policy and practice in this area. These include subjects such as gender, the media, citizenship, and multiculturalism. The insight provided by this wide-ranging book will be of great use to scholars of Religious Studies, Interreligious Dialogue and Islamic Studies, as well as Politics, Culture, and Migration.

This book brings together essays on modernity, social integration, social differentiation and social exclusion by Lockwood, Mouzelis and other eminent social theorists. At the same time it addresses critical issues facing Western democracies, such as social exclusion, the underclass, unemployment, new inequalities, globalization and the new competitive environment. Its novelty lies in the imaginative way it uses social theory to critique old, and suggest new, policies and political practices.

Sociologists and anthropologists have had a long interest in studying the ways in which cultures shaped different patterns of health, disease, and mortality. Social scientists have documented low rates of chronic disease and disability in non-Western societies and have suggested that social stability, cultural homogeneity and social cohesion may play a part in explaining these low rates. On the other hand, in studies of Western societies, social scientists have found that disease and mortality assume different patterns among various ethnic, cultural and social-economic groups. The role of stress, social change and a low degree of cohesion have been suggested, along with other factors as contributing to the variable rates among different social groups. Social cohesion has been implicated in the cause and recovery from both physical and psychological illnesses. Although there has been a large amount of work established the beneficial effects of cohesion on health and well-being, relatively little work has focused on HOW increased social cohesion sustains or improves health. This work is based on the premise that there are risk factors, including social cohesion that regulate health and disease in groups. One of the challenges is how to measure social cohesion – it can be readily observed and experienced but difficult to quantify. A better understanding of how social cohesion works will be valuable to improving group-level interventions.

In an original, and highly interdisciplinary, mixed method approach, Green and Janmaat identify four major traditions of social cohesion in developed societies, analyzing how these various mechanisms are withstanding the strains of the current global financial crisis.

Offers an insightful yet readable study of the paths - and challenges - to social cohesion in Africa, by experienced historians, economists and political scientists.

This publication contains guidance on developing a methodological framework for social cohesion indicators which can be applied at local, regional, national and European levels, covering the conceptual approach used and its practical application. It sets out the results of the main applications and trials carried out in 2003 and 2004 and how they tie in with devising a framework of action.
