Kidnapped by aliens to be sold as a pet in a distant part of the galaxy, young Chicago commodities broker Marcus Walker and his companion, George, a speech-enhanced dog, have managed to outwit their abductors, only to find themselves stranded billions of miles from Earth, with no way home. Reprint.

The candle of distant Earth: The conclusion of the Taken Trilogy continues the space adventures of successful commodities broker-turned-alien abductee Marcus Walker and his talking canine companion, George--Novelist.

Foster is in top form here, entertainingly mixing politics, comedy, and intriguing alien anthropology.

Booklist Abducted by aliens to be sold as pets in a more civilized part of the galaxy, earthlings Marcus Walker and a scruffy dog named George (speech-enhanced to increase his market value) have managed to escape their captors. Walker loves being humankind's first galactic traveler!until he remembers he hasn't a clue where home is or how to get there. So the erstwhile commodities broker becomes a chef, whipping up delicacies for demanding alien palates. Of course he never imagined that the way back to Chicago would involve swapping his easy-living adopted planet for an all-out, age-old war many parsecs away. But hey, it's all for a good cause, he has George and their two fellow escapees for company, and what else is there to do, besides avoid nasty aliens? Plenty, as it turns out.

An enjoyable read . . . Foster's writing is smooth and his characters engaging.

Library Journal

From science fiction legend and New York Times bestselling author Alan Dean Foster comes the climactic final novel in The Taken trilogy, his electrifying space epic about a man and his dog for whom the expression

out of this world

takes on a whole new meaning. Location is everything. In Chicago, Marcus Walker was a hotshot commodities broker. In the cargo hold of the alien Vilenjji spaceship, he and a laconic dog named George, who has been speech-enhanced to increase his value, are just two more primitive creatures being shipped to the civilized part of the universe, where the market for cuddly extraterrestrial

pets

is busting wide open. Though Walker and George manage to escape, man and dog are far from overjoyed, being even farther from Earth!billions of miles, in fact!and without a clue as to whether the direction home is up, down, or sideways. Possessing universe-level social skills, Walker becomes the leader of his own armada. Yet even a fleet commander is hard pressed to find a piece of space that no one's ever heard of, much less cares to find. To make matters worse, it seems the Vilenjji are proving to be notoriously sore losers. Even if Walker does pull off the impossible and pinpoint his needle of a solar system in the universe haystack, there's a good chance that the unrelenting Vilenjji will get to him before he ever gets to Wrigley Field. Yep, it's a wide-open universe out there, bursting with possibilities!and Walker's going to get hit with all of them.

This exquisite, resonant novel by PEN/Faulkner winner James Salter is a brilliant portrait of a marriage by a contemporary American master. It is the story of Nedra and Viri, whose favored life is centered around dinners, ingenious games with their children, enviable friends, and near-perfect days passed skating on a frozen river or sunning on the beach. But even as he lingers over the surface of their marriage, Salter lets us see the fine cracks that are spreading through it, flaws that will eventually mar the lovely picture beyond repair. Seductive, witty, and elegantly nuanced, Light Years is a classic novel of an entire generation that discovered the limits of its own happiness!and then felt compelled to destroy it.

Ever since his classic debut, The Tar-Aiyam Krang, the first of the wildly successful Pip and Flinx adventures, New York Times bestselling author Alan Dean Foster has captivated readers around the world. Now this writer of bold imagination and stunning originality has created an electrifying space epic set in a universe at once strangely familiar and starkly terrifying. Familiar because the universe is ours; terrifying because the human condition might soon be. . . . Not so long ago Marcus Walker was just another young commodities trader in Chicago, working hard and playing harder. But that's all in the past, part of a life half forgotten!a reality that vanished when he was attacked while camping and tossed aboard a starship bound for deep space. Desperately, Walker searches for explanations, only to realize he's trapped in a horrifying nightmare that is all too real. Instead of being a rich hotshot at the top of the food chain, Walker discovers he's just another amusing novelty, part of a cargo of

cute!

aliens from primitive planets!destined to be sold as pets to highly advanced populations in

civilized!

regions of the galaxy. Even if he weren't constantly watched by his captors, Walker has few options. After all, there is no escape from a speeding starship. Another man might resign himself to the inevitable and hope to be sold to a kindly owner, but not Walker. This former college football star has plenty of American ingenuity and no intention of admitting defeat, now or ever. In fact, he's only just begun to fight. The adventure will continue with two more novels

Lambda Literary Award Finalist | A New York Times Book Review Editors' Choice Named a best book of 2019 by Parade The Light Years is a joyous and defiant coming-of-age memoir set during one of the most turbulent times in American history "This stunningly beautiful, original memoir is driven by a search for the divine, a quest that leads Rush into some dangerous places . . . The Light Years is funny, harrowing, and deeply tender."

Kate Tuttle, The L.A. Times

"Rush is a fantastically vivid writer, whether he's remembering a New Jersey of 'meatballs and Windex and hairspray' or the dappled, dangerous beauty of Northern California, where 'rock stars lurked like lemurs in the trees.' Read if you loved... Just Kids by Patti Smith."

Leah Greenblatt, Entertainment Weekly

As mythic and wild with love, possibility, and danger as the decades it spans, you'll read The Light Years with your breath held. Brutal, buoyant and wise to the tender terror of growing up, Chris Rush has written a timeless memoir of boyhood in the American wilderness.

Emma Cline, author of The Girls

Chris Rush was born into a prosperous, fiercely Roman Catholic, New Jersey family. But underneath the gleaming mid-century house, the flawless hostess mom, and the thriving businessman dad ran an unspoken tension that, amid the upheaval of the late 1960s, was destined to fracture their precarious facade. His older sister Donna introduces him to the charismatic Valentine, who places a tab of acid on twelve-year-old Rush's tongue, proclaiming:

This is sacrament. You are one of us now.

After an unceremonious ejection from an experimental art school, Rush heads to Tucson to make a major drug purchase and, still barely a teenager, disappears into the nascent American counterculture. Stitching together a ragged assemblage of lowlifes, prophets, and fellow wanderers, he seeks kinship in the communes of the west. His adolescence is spent looking for knowledge, for the divine, for home. Given what Rush confronts on his travels!from ordinary heartbreak to unimaginable violence!it is a miracle he is still alive. The Light Years is a prayer for vanished friends, an odyssey signposted with broken and extraordinary people. It transcends one boy's story to perfectly illustrate the slow slide from the optimism of the 1960s into the darker and more sinister 1970s. This is a riveting, heart-stopping journey of discovery and reconciliation, as Rush faces his lost childhood and, finally, himself.

In the fall of 2005, Frank Turner was virtually unheard of. His rock band, Millions Dead, was finishing up a grueling tour and had agreed that their show on September 23 would be their last. The entry on the band's schedule for September 24 read simply: "Get a job."Cut to July 2012!the London Olympics, where Turner and his backing band, The Sleeping Souls, are playing the pre-show, after having headlined sold-out arena shows across the UK for months.

The Road Beneath My Feet

is the unvarnished story of how Turner went from crashing on couches at house shows to performing for thousands of screaming fans

who roar his every lyric back at him.

Told through tour reminiscences, this is a blisteringly honest tale of a rock career that's taken Turner from drug-fuelled house parties and the grimy club scene to international prominence and acclaim. But more than that, it is an intimate account of what it's like to spend your life constantly on the road, sleeping on floors, invariably jetlagged, all for the love of playing live music.

This exquisite, resonant novel is a brilliant portrait of marriage by a contemporary American master. Even as he lingers over the lustrous surface of Viri and Nedra's marriage, James Salter makes us see the cracks that are spreading through it, flaws that will in time mar it beyond repair. "An unexpectedly moving ode to beautiful lives frayed by time".

I have this strange sense that my silence is preparing me for something I can't name . . . Elizah Rayne is nothing like other fourteen-year-old girls. More interested in bird bones than people, she wraps herself in silence. Trying to escape the shadow of her gambler father, Elizah and her mother move into an old house that borders a cemetery. All her mother wants is for them to have "normal" lives. But that becomes impossible for Elizah when she finds a human jawbone by the river and meets Nathaniel, a strangely hypnotic boy who draws Elizah into his dreamlike and mysterious world. Only by forgetting everything she knows can Elizah understand the truth about Nathaniel and discover an unimaginable secret.
