Business retention and expansion (BRE) is regarded as the most practical and accessible method for economic development at the city, town, or neighborhood scale. This comprehensive volume centers on the belief that BRE is the top responsibility for a community economic development official. BRE is an asset-based approach designed to systematically strengthen the connection between businesses and the community while encouraging each business to continue operations and expand in the community. It focuses on the community 's existing businesses instead of those it doesn 't have. This book illustrates many different facets of BRE, from big-picture and theory to lessons learned about BRE from practitioners and academics with diverse perspectives and backgrounds. The authors demonstrate diverse ways of reaching out and responding to existing businesses. They explore several topics related to or at the very heart of BRE including: business clusters, entrepreneurship, community outcomes, business assistance, transportation systems, energy efficiency, business succession, and defining BRE success. These include research, program evaluation, and case studies. This book offers both theoretical and applied points of views, and will be of great interest to local practitioners, state/provincial officials, and students of economic development. It was originally published as a special issue of the journal Community Development.

Learn about the history of Central Park in New York with iMinds Travel's insightful fast knowledge series. Central Park is a haven for New Yorkers and a tourist's paradise. Nestled among some of the tallest buildings in one of the most densely populated cities in the world, Central Park stretches out, taking up 840 acres of prime real estate. It is first and foremost an escape from the hustle and bustle of city life. Some may think the city was built around the park, but it is entirely man-made, a tribute to modern architecture and landscaping. And it might not exist today had the people of New York not fought for it for more than 150 years. As early as 1844, there were calls by the poet William Cullen Bryant and other prominent New York residents for a public park in the marshy hinterland just north of the city proper. Bryant and pre-eminent architect and landscape designer Andrew Jackson Downing led the push for land to be put aside before it was entirely swallowed by buildings. With public support they managed to get politicians on both sides to agree to the idea. In 1858 the city bought most of the land the park now sits on for 5 million dollars. That's about one hundred million dollars in today's money! At the time, the land was mostly vacant scrubland and rocky outcrops. It was also used as a garbage dump. When the city acquired the land, surveyors and police were sent in to clear the area, and this often meant ejecting squatters and their goats or pigs! iMinds will tell you the story behind the place with its innovative travel series, transporting the armchair traveller or getting you in the mood for discover on route to your destination. iMinds brings targeted knowledge to your eReading device with short information segments to whet your mental appetite and broaden your mind.
