Computational Finance - World Scientific

Bookmark File PDF Computational Finance A Scientific Perspective

Computational finance is a branch of applied computer science that deals with problems of practical interest in finance. Some slightly different definitions are the study of data and algorithms currently used in finance and the mathematics of computer programs that realize financial models or systems.. Computational finance emphasizes practical numerical methods rather than mathematical proofs ...

Computational finance - Wikipedia

Our Computational Finance MSc will introduce you to the computational methods that are widely used by practitioners and financial institutions in today's markets. You will get a solid foundation not only in traditional quantitative methods and financial instruments, but also scientific computing, numerical methods, high-performance computing, distributed ledgers, big-data analytics and agent-based modelling.
