Data Driven Security Analysis Visualization

In Data-Driven Security, Jay Jacobs and Bob Rudis draw together three of the most important topics in IT—security, data analysis, and visualization—to present a real-world security strategy to defend your networks. Turning their backs on insufficient security based on hunches and best practices, the authors help you access the world of security data analysis and visualization, where real data drives security decisions, and they teach you to apply the principles of that security with real ...

Data, Driven Security: Analysis, Visualization and ...

Helps IT and security professionals understand and use data, so they can thwart attacks and understand and visualize vulnerabilities in their networks Includes more than a dozen real-world examples and hands-on exercises that demonstrate how to analyze security data and intelligence and translate that information into visualizations that make plain how to prevent attacks Covers topics such as how to acquire and prepare security data, use simple statistical methods to detect malware, predict ...
