intrinsic motivation central to how deeply and how well students learn. The empirical research, our third reason, has provided considerable support for the idea that intrinsic motivation is key to sustained learning. This book fills a gap in the science education literature by identifying motivational and affective processes involved in sci-

At the same time, dopamine levels reach a lifetime peak in adolescents. Dopamine supports motivation and reward-driven learning, which drives them to value immediate gratification over future gains, which can lead to risky decisions. Motivation is influenced by rewards like novelty, thrills and the presence of peers.
