To make a cladogram, you must first look at the animals you are studying and establish characteristics that they share and ones that are unique to each group. For the animals on the table, indicate whether the characteristic is present or not. Based on that chart, create a cladogram like the one pictured above.

between groups of organisms, including their common ancestors. The term "cladogram" comes from the Greek words *clados*, which means "branch," and *gramma*, which means "character." The diagram resembles the branches of a tree that extend outward from a trunk. However, the shape of the cladogram isn't necessarily vertical.
