## **Interconnecting Smart Objects with IP: The Next Internet**

...

Interconnecting Smart Objects with IP: The Next Internet explains why the Internet Protocol (IP) has become the protocol of choice for smart object networks. IP has successfully demonstrated the ability to interconnect billions of digital systems on the global Internet and in private IP networks. Once smart objects can be easily interconnected, a whole new class of smart object systems can begin to evolve. The book discusses how IP-based smart object networks are being designed and deployed.

LTE or 4G technology is decent for regular use, but a 5G connection could allow you to download files at 1 gigabit per second (Gb/s). A high-definition Blu-ray movie file can easily exceed 20 gigabytes (GB) in size. But instead of having to wait for a couple of hours, you can have your film ready in less than a minute.
