Lcd Projector Buying Guide

LCD technology is widely available. Projectors that use LCD technology are usually affordable, practical, and reliable. An LCD projector will work good for a home cinema, projecting images during a business meeting, as a teaching tool in an education center. It's also good as a projector for gaming.

What is an LCD Projector? Buying Guide 2019

LCD - LCD (liquid crystal display) projectors place three LCD glass panels in the projector, one for red, one for green, and one for blue. Light passes through the panels and individual pixels open or close to produce the image. Pros: LCD projectors typically appear brighter and have better color accuracy. This leads to an image that seems more sharp and vivid overall.
