McGraw Hill; Chapter 12 Thermal Energy; Pg. 318-345 on ...

The principle stating that energy cannot be created or destroyed, although it can be changed from one form to another. The law of conservation of energy has been established by a multitude of meticulous measurements of gains and losses of all known forms of energy including mechanical, electrical, magnetic, thermal, chemical, and nuclear forms.

Protein-energy malnutrition occurs as a result of a relative or absolute deficiency of energy and protein. It may be primary, due to inadequate food intake, or secondary, as a result of other illness. For most developing nations, primary protein-energy malnutrition remains among the most significant health problems.

(For example there are three degenerate 3p orbitals.) When electrons fill degenerate orbitals, they fill singly first because it takes some energy for two electrons to coexist in the same orbital space due to repulsion. In its ground state (lowest-energy state), electrons occupy the lowest-energy orbitals. Multielectron atom 1.
