The GridView™ Medium Voltage & Current Sensor is a direct replacement for standard potential (voltage) and current transformers. The insulator body is casted in hydrophobic cycloaliphatic epoxy (HCEP) using a state of the art injection molding process. HCEP construction provides superior arc track, ozone, and ultraviolet-resistive properties while maintaining physical strength.

Medium Voltage (MV) is a term used for a range of electricity distribution system voltages from 6 kV up to 36 kV. Cable accessories for this voltage range have similar design and performance requirements that distinguish them from accessories for 'low voltage' (typically 1 kV) and those for "high voltage" (typically 72 kV and above).
