Meraki vs. Aruba vs. Aerohive—Choosing the Right AP ...

With Aerohive in a room next door behind a cinder block wall I was able to connect 70 plus devices while streaming a video. The Meraki was a different story while in the same room it stopped allowing connection of clients after 30 devices. Probably another thing that through me off was the Meraki push of the dashboard instead of the APs.

Meraki has a more complete portfolio if you're looking for a single solution for your network infrastructure. Aerohive is probably stronger in terms of wireless (since that's their focus) by not really by much. Both are decent and fairly reliable solutions. There really isn't a clear winner in my book.

Meraki Wireless Solution Comparison - Hummingbird Networks

Don't know Meraki but I've put a few Aerohive networks in. Quite good products - although the "controller less design" thing is a bit of a red herring. It's great for meshing where you don't have cabling to every location - you can still deploy wireless APs and use 5ghz as the back haul instead of cat5.
