Activity 5.4 Calculating Properties of Solids Answer Key. Introduction. Have you ever stopped to think why it is that you are able to float in water? The reason has to do with the concept of buoyancy. The volume of water that your body displaces has weight. The weight of the displaced water pushes upward on you, while the weight of your

body ...

Activity 5.4 Calculating Properties of Solids Answer Key

The answer again deals with weight, average density, and volume. If you were to fill a glass with water and place it in a tub full of water, the glass would sink. Like metal, glass has a weight

density that is greater than water. If you were to place the same glass in a tub full of water, but with no liquid in the glass, it would float.
