SAP TM Configuration required to integrate with SAP EM

Extended memory (EM) is the core of SAP Memory Management. The majority of data for a user session (user context), which different work processes access when processing requests, is stored here. These are mainly dialog work processes, since this is where most user interaction with the system is processed.

Extended Memory (EM) - SAP Help Portal

In a system with 100 GB swap space, 50 GB should be reserved for an ABAP application server instance and 50 GB for non-SAP processes (e.g. database). To prevent the ABAP application server instance from consuming more than the available 50 GB swap space, you set `abap/heap_area_total = 40 GB` and `em/proc_max_size_mb = 10 GB`.
