Scandium

Fireplace Guide

A masonry fireplace's firebox is built with special, heat-resistant firebrick, and the interior of the chimney is lined with heat-resistant, square clay tubes, called "tiles." The visible parts of the chimney, hearth, and fireplace are typically made of non-combustible materials like standard brick, stone, or tile.

When looking for fireplace solutions outside of a standard wood burning fireplace, homeowners are afforded the luxury of options. All, however, have some pros and cons that are important to consider. First and foremost, there is fuel. If your home runs on oil, then it will be difficult for you to secure a gas powered fireplace without

bringing in external fuel. The same is true

Ventless Gas Fireplaces: How Safe are They Really ...

Scandium is a silvery white, moderately soft metal. It is fairly stable in air but will slowly change its colour from silvery white to a yellowish appearance because of formation of Sc_2O_3 oxide on the surface.
