**Service-oriented
architecture -
Wikipedia**

Service-oriented architecture is an implementation of the "service concept" or "service model" of computing. In this architectural style, business processes are implemented as software services, accessed through a set of strictly defined application program interfaces (APIs) and

bound into applications through dynamic service orchestration.

What is SOA? And Understanding Service-Oriented Architecture

Service Oriented Architecture (SOA) is an architectural approach in which application components makes use of a collection of services available in a network, which

Download File PDF Service

communicates with each other. In service oriented architecture, services communicate with each other, either to pass the data or to coordinating an activity.

What Is SOA? Service Oriented Architecture [2020] Explained

"Service Oriented Architecture is a hot, but often misunderstood topic in
